Vote of Thanks

Danielle George
IET Deputy President

IET Strategies

The aim of IET Scotland is to celebrate and promote professional engineering in Scotland. Our objectives are to bring engineers and organisations together to collaborate and share ideas, and to promote engineering to all. Active volunteering is encouraged within our membership and we aim to influence the Scottish Government's understanding of the benefits of engineering and technology.

The 2019 theme for IET Scotland is celebrating Women in Engineering. This dinner launches a series of events that will be run by IET Scotland, and other organisations, to promote engineering to women.

To achieve our objectives, we plan to organise Recognition Events to celebrate members who have achieved CEng, IEng, EngTech, ICT Tech or become Fellows. Christmas lectures and STEM events will be held to promote engineering to students, schools, teachers and parents. We will be organising a conference to be held, inviting universities, companies, and other engineering institutions to help the promotion of engineering throughout Scotland.

Head Table - 2019 IET Scotland Annual Dinner

The original dinner brochure included full biographies for the Head Table. For this shortened website evidence copy, the biographies have been omitted and the names and roles are retained below.

Name	Role shown in / summarised from the original brochure
